---

## Experience

### Curiosidade

12 years

#### Frontend Developer

February 2017 - Present

Full website development with WordPress and Magento 2 platforms (Frontend and backend).

Maintenance of a Prestashop store.

## WordPress

Custom theme development from scratch using Sage theme starter (Design was hand off from Figma).

In most projects, the backend functionalities were enhanced with the Advanced Custom Fields Pro plugin.

Online stores were developed with WooCommerce.

Common frameworks/libraries used: Bootstrap 4, jQuery, SCSS

Tools: Webpack, Browsersync, Gulp

some of the projects developed with WordPress:

<http://www.coltim.com>

<http://www.sairdacasca.com>

<http://www.obidosvillageguesthouse.com>

<http://www.buggypower.eu>

## Magento 2

Full e-commerce development (Design was hand off from Photoshop and Figma).

<http://www.celeiro.pt>

Theme developed from scratch using Bootstrap 3.

Customer ERP integration through Magento 2 API and custom modules development.

Implemented IfThenPay and Payline payment systems.

<http://www.hussel.pt>

Theme developed based on Luma (Magento 2 starter theme).

Customer ERP integration through Magento 2 API and custom modules development.

<http://www.farmaciasilva.pt>

Maintenance, new features development and a little design refresh.

This store was developed with Magento 1

## Project and Account Manager

2012 - February 2017 (5 years 2 months)

Portugal

Client management, project management, team management, budgeting and features definition of all projects.

For several years I served as a point of contact between some of the top digital communication agencies such as Fuel, Havas, REMAC, ComOn, BBDO in order to develop websites, Facebook Apps, among others, while leading the inhouse team of developers at Curiosidade

My work consisted on budgeting the project according to the agency's briefing and the estimated time necessary to deliver.

After the project was developed an analysis was made to see if the project was within the estimated time/budget to calculate the profit.

Other tasks: Deliver mockups and prototypes to designers.

## Flash Developer

2007 - 2012 (6 years)

Lisbon Area, Portugal

In the Website and social games development (Facebook Apps like Farmville).

The websites were developed from scratch, with ActionScript 2 and 3 using FDT IDE or Flash Builder.

All websites had a admin area that wrote the data into an XML file. That file was then read by the ActionScript website.
